Enable Java for Kronos

Brie McIntosh - 2022-03-25 - How-to Articles

Java is not automatically enabled for Kronos. The steps below will help you walk through the enabling process for the Java plug-in.

Step-by-step

1. To start, go to Kronos login page in Safari
2. Then go to Safari **Preferences** by clicking on the word **Safari** in the menu bar and choosing **Preferences**

For Safari 10

1. Navigate to the **Security** tab and then select the **Plug-in Settings...** option at the bottom of the page
2. Select the **Java** option in the left side menu, then select **On** in the dropdown list on the right - next to **kronos.main.ad.rit.edu**
3. Press "Done" to complete

For Safari 11

1. Click on **Websites** tab

2. Scroll down to **Java** on the left hand side and select it
   Check the box to turn Java "On"
   On the right hand side, choose "On" next to Kronos

3. Close the window
   Now try to login to Kronos
