# Fix Autodesk Standalone license expiring

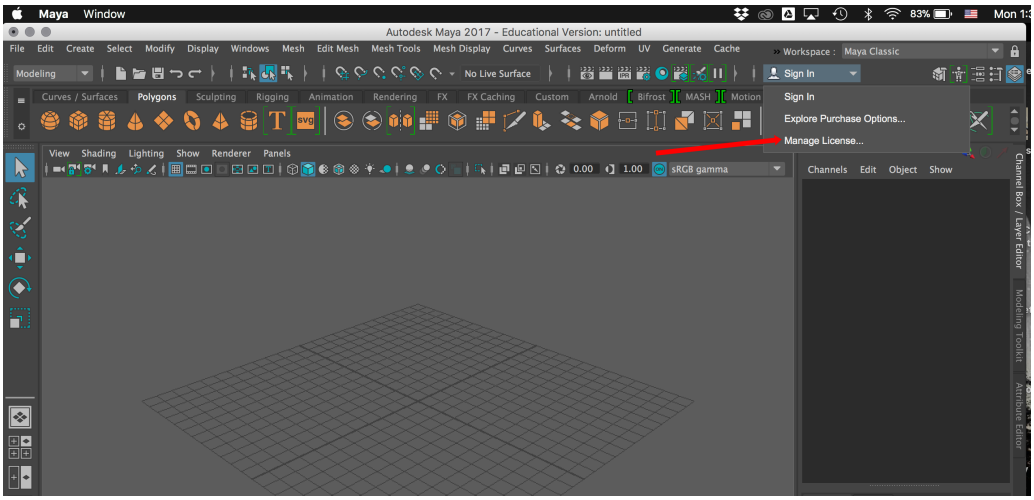

Brie McIntosh - 2022-04-12 - How-to Articles

Use these steps to "update" the serial number used to a non-expiring number. In this case, we are fixing Maya 2017.

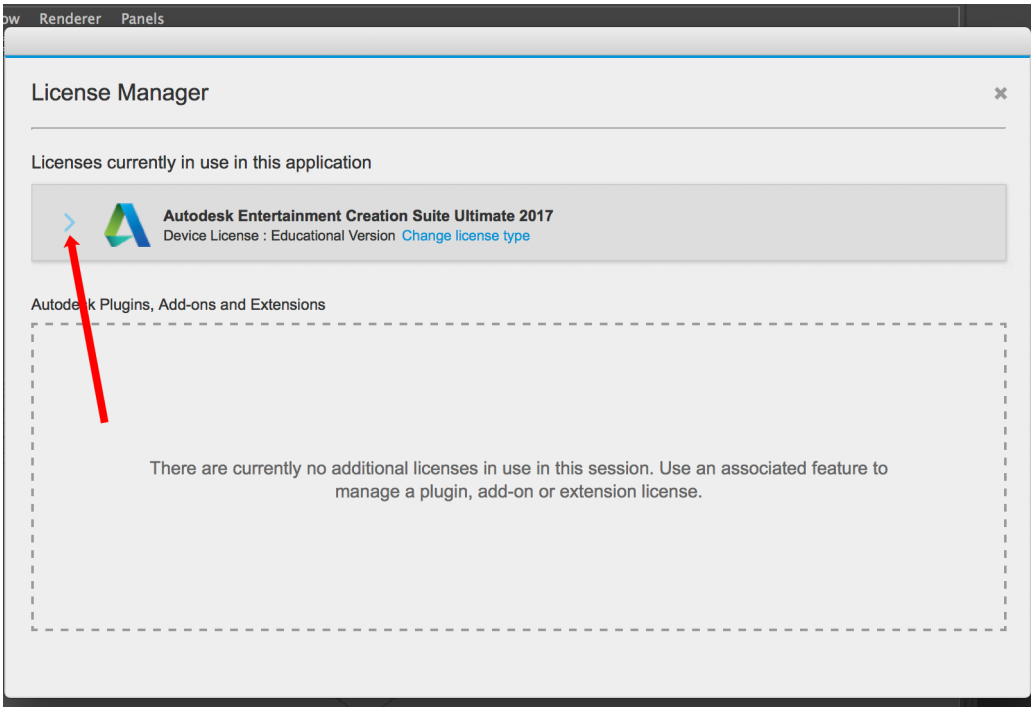

## Step-by-step guide

1. Launch Maya and continue past prompts to get into the software

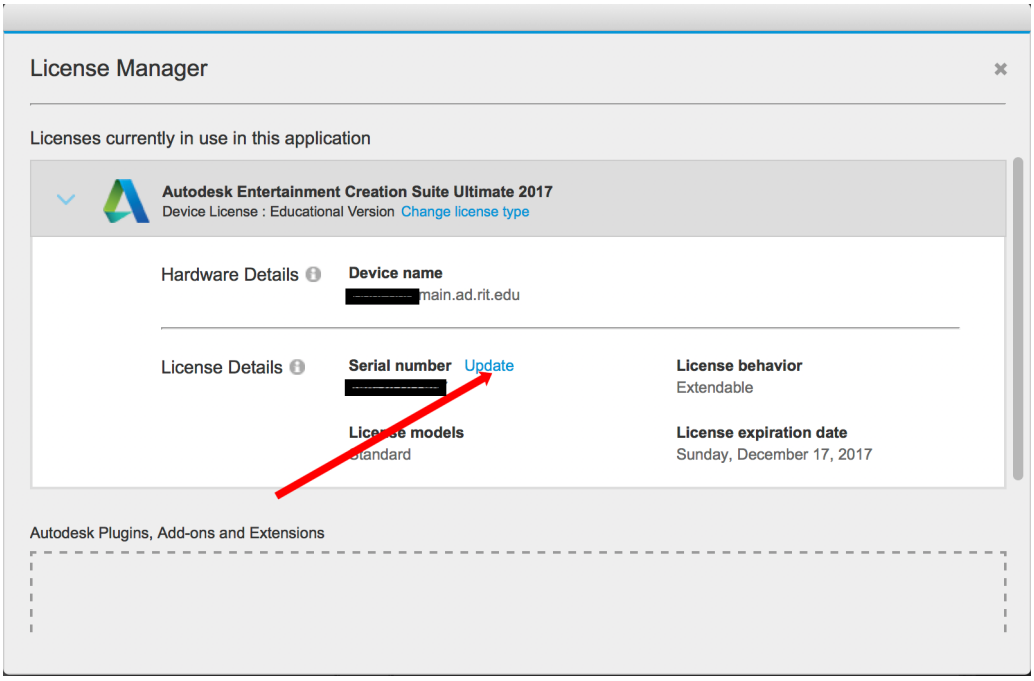

2. Now, click on the "Sign In" button and choose **Managed License**

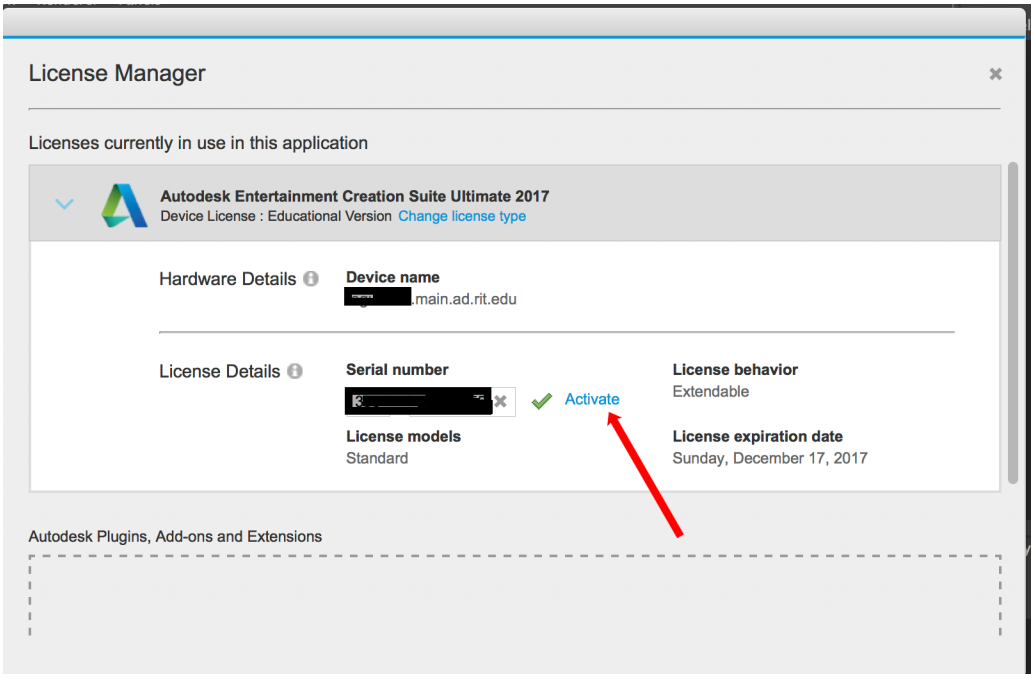

3. In the next dialog, click the arrow next to the Enterprise license to see the details of the license

4. Now, click on **Update License** to change the serial number to the new correct one

5. Enter new serial number and click **Activate**

License should now be updated and Autodesk will no longer ask for activation on launch.
