Fix Autodesk Standalone license expiring

Brie McIntosh - 2022-04-12 - How-to Articles

Use these steps to "update" the serial number used to a non-expiring number. In this case, we are fixing Maya 2017.

Step-by-step guide

- 1. Launch Maya and continue past prompts to get into the software
- 2. Now, click on the "Sign In" button and choose Managed License

3. In the next dialog, click the arrow next to the Enterprise license to see the details of the license

4. Now, click on **Update License** to change the serial number to the new correct one

5. Enter new serial number and click **Activate**

License should now be updated and Autodesk will no longer ask for activation on launch.
