How to Add Canon Plug-in to Lightroom

CAD Tech Student Managers - 2025-08-19 - How-to Articles

Step 1

Open Lightroom and select "File" from the menu. If the plug-in doesn't exists under "Plug-in Extras" select the "Plug-in Manager..."

Step 2

Once the Plug-in Manager loads, select "Add" to find the location of the Canon Print Studio Pro plug-in.

AdobeStock Installed and running		V Status		
)	Aperture/iPhoto Importer Plug-in Installed and running	Path: /Users/cclientadmin/Library/Application Support/Adobe/Lightroom/Modules/CNPSPPILR.Irdevplugin Show in Finder		
)	Canon Print Studio Pro Installed and running	Version: 2.2.1 Status: This plug-in is enabled.		
)	Canon Tether Plugin Installed and running	Enable Disable		
)	ColorChecker Passport Installed and running	Plug-in Author Tools No diagnostic messages		
)	Facebook Installed and running			
)	Flickr Installed and running			
)	Nikon Tether Plugin Installed and running			

Step 3

The Canon Print Studio Pro plug-in should exist in the Lightroom folder. To find it go to "Applications→Adobe Lightroom Classic CC"→ CNPSPPILR.Irdevplugin" once the plug-in has been selected, hit "Add Plug-in" to complete adding it.
