## **How to Add Canon Plug-in to Lightroom**

CAD Tech Student Managers - 2025-11-10 - How-to Articles

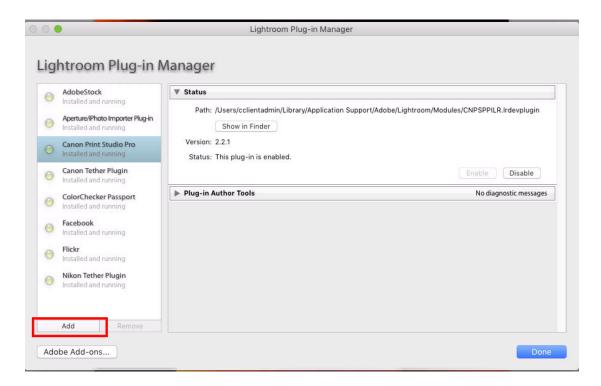

## Step 1

Open Lightroom and select "File" from the menu. If the plug-in doesn't exists under "Plug-in Extras" select the "Plug-in Manager..."

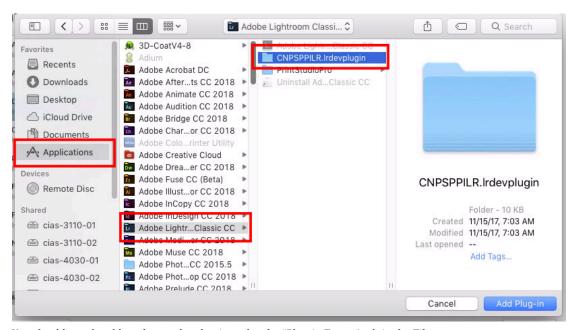

## Step 2

Once the Plug-in Manager loads, select "Add" to find the location of the Canon Print Studio Pro plug-in.

## Step 3

The Canon Print Studio Pro plug-in should exist in the Lightroom folder. To find it go to "Applications→Adobe Lightroom Classic CC"→ CNPSPPILR.lrdevplugin" once the plug-in has been selected, hit "Add Plug-in" to complete adding it.

You should now be able to locate the plug-in under the "Plug-in Extras" tab in the File menu.
