How to add my Epson Stylus printer to my Mac from home

CAD Tech Student Managers - 2026-05-13 - [How-to Articles](#)

Description :

The latest printer driver for this product is available from Apple's Software Update. Here's how to get it:

1. Do one of the following:
   - **USB:** Connect your product to your Mac using a USB cable and make sure the product is turned on.
   - **Wireless:** Make sure your product is turned on. Connect your product to your wireless network.
   - **Ethernet:** Connect your product to your Mac using an Ethernet cable and make sure the product is turned on.

2. Go to the Apple menu on your Mac, then select **System Preferences**.

3. Select **Printers and Scanners**, **Print & Scan**, or **Print & Fax**.

4. Do one of the following.
   - If your printer is not on the list, go to **step e**.
   - If your printer is on the list, select your printer model and click the "-" (minus) button. Then go to **step e**.

5. Click the "+" button. (If you see the **Add Printer or Scanner...** option, select it.)
   In the screen that appears, select your printer model as below:
   - **USB connection:** Select the EPSON Series (USB) product.
   - **Wireless or Ethernet connection:** Select the EPSON Series (Bonjour) product.

   Select your EPSON Series product in the **Use** or **Print Using** drop-down list, then click the **Add** button.

6. Go to the Apple menu on your Mac, select **Software Update** or **App Store**, then click the **Updates** tab.

7. Do one of the following:
   - If you see an update from Epson, select **UPDATE** to install it. **Note:** Apple Software Update may find multiple updates for your system. You may choose to install all or some of the updates.
   - If an update is not available, you already have the latest Epson driver for your product.
