

How to install Revit on a Mac/Windows

CAD Tech Student Managers - 2024-11-21 - How-to Articles

NOTICE: It is HIGHLY RECOMMENDED that you are on at least Mac OSX Sierra (10.12) with 8 GB memory (RAM) and 100 GB of storage (hard drive) to reduce problems with the VM

This process will take a while and computer should be left on and awake. Also multiple parts require downloading different things so an internet connection is also required.

Installing VMware Fusion:

1. Go to <http://homeuse.rit.edu>
2. Click 'Continue to Software Portal'

1. Click the 'VMware' tab

1. Click 'Add to Cart'. It is free for students so do not worry about being charged.

1. Click the 'Download Button'

1. Once the .dmg is downloaded, open it
2. Double-click to install

Creating a Windows VM on Fusion

1. Open up VMware Fusion, go to the top of the screen, and select 'File' → 'New...'

6. Click continue

1. Fill in the information you want your Windows VM account to have and insert your product key, and click continue.

1. Go to 'Processors & Memory'

1. Close out of Processors & Memory and go to VM settings

1. Change the disk size. 100 GB is minimum space you should select however it is recommended if you can spare the space to change it to 200 GB

1. Close out of Hard Disk and hit the play button

1. Select a version, Windows 64-Bit, and the language of your choice. Then click 'Install Now'

1. Click 'Launch Now'

1. Enjoy!
