How to Make a Digital Signature in Acrobat

CAD Tech Student Managers - 2025-08-31 - How-to Articles

Digital ID

before making a digital signature in Acrobat, you need to know what a digital ID is. according to Adobe, "A *digital ID* is like an electronic driver's license or passport that proves your identity". It is security for your signature to be valid.

Digital IDs contain two keys: the *public key* locks, or encrypts data; the *private key* unlocks, or decrypts that data.

Adding a Digital ID

- 1. In Acrobat, click the **Edit** menu and choose **Preferences** > **Signatures**.
- 2. On the right, click More for Identities & Trusted Certificates.
- 3. Select Digital IDs on the left, and then click the Add ID button

1. Select the option A New Digital ID I Want To Create Now, and click Next.

Add Digital ID	×
Add or create a digital ID to sign and encrypt documents. The certificate that comes with your digital ID is sent to others so that they can verify your signature. Add or create a digital ID using:	
○ My existing digital ID from:	
A file	
A roaming digital ID accessed via a server	
○ A device connected to this computer	
A new digital ID I want to create now	
Cancel < Back <u>N</u> ext >	

Specify where to store the digital ID,

d Digital ID	
Where would you like to store your self-signed digital ID?	
New PKCS#12 digital ID file Creates a new password protected digital ID file that uses the standard PKCS#12 format. This common digital ID file format is supported by most security software applications, including major web browsers. PKCS#12 files have a .ptx or .p12 file extension.	
○ Windows Certificate Store	
Your digital ID will be stored in the Windows Certificate Store where it will also be availa to other Windows applications. The digital ID will be protected by your Windows login.	ble

of the 2 options to store the Self-Signed ID, select the one shown below, and click ${\bf Next.}$

Info for Digital ID

Type all the information required for the digital ID here. When you certify or sign a document, the name appears in the Signatures panel and in the Signature field.

where it says **"key algorithm"**, there are 2 different ones to choose from. The 2048-bit RSA option offers more security than 1024-bit RSA, but 1024-bit RSA is more universally compatible. you can choose either depending on your need.

From the **Use Digital ID For** menu, choose whether you want to use the digital ID for signatures, data encryption, or both.

Click Next

Creating a password for the digital File

You will create a password to be used in order to access the Digital ID. In order to do this you need to reference the file location

Add Digital ID				×
Enter a file location and password for your new digital ID you use the digital ID to sign or decrypt documents. You so that you can copy this file for backup or other purpos file using the Security Settings dialog.	file. You will need t should make a not es. You can later ch	the password when e of the file location ange options for this

ers //AppData\Roaming\Adobe\Acrobat\DC\Sec	urity\JohnDoe.pfx	B <u>r</u> owse		
Password:				
Strong				
<u>C</u> onfirm Password:				

Cancel			< <u>B</u> ack	<u>F</u> inish

in the file name section, put where you want the key to be located.

The ID is created. You can export and send your certificate file to contacts who can use it to validate your signature.

Register a digital ID

- 1. In Acrobat, click the **Edit** menu and choose **Preferences > Signatures**. In Identities & Trusted Certificates, and click **More**.
- 2. Select Digital IDs on the left.
- 3. Click the Add ID button.

4. Choose one of the following options:

A File: Select this option if you obtained a digital ID as an electronic file. Follow the prompts to select the digital ID file, type your password, and add the digital ID to the list.

A Roaming Digital ID Stored On A Server: Select this option to use a digital ID that's stored on a signing server. When prompted, type the server name and URL where the roaming ID is located.

A Device Connected To This Computer: Select this option if you have a security token or hardware token connected to your computer.

click Next after choosing an option.

Making the signature:

Now you are ready to make your signature in Acrobat

- 1. Open a PDF document in Acrobat.
- 2. Click the "Fill & sign" tool in the right pane.
