

## Remote Computing Resources

CAD Tech Student Managers - 2024-11-06 - Services

CADTech has developed several solutions to enable academic and business continuity remotely.

**Please report any problems via our online [helpdesk](#) (link below). This is always the best and fastest way to get help with a computer problem.**

<https://helpdesk.cad.rit.edu/new-ticket>

## VPN (Virtual Private Network)

In the past we've used VPN to provide secure access to services from off campus, e.g. file shares. We're working hard to scale VPN capacity to meet anticipated demand, but it might become a bottleneck for internet traffic to campus, *especially* for file shares. We're currently asking you to only use VPN if absolutely necessary. We're trying to provide secure solutions to our services in ways that don't rely on VPN. Please continue reading below before you connect to VPN for file share access. Very few services and applications will require VPN and we're working hard to eliminate all dependence on VPN.

The Oracle E-Business Suite, aka "**mybiz.rit.edu**", will continue to require VPN for off-campus access.

## File Shares

You can get to most popular CAD file shares from this web site: <https://cloud.cad.rit.edu/>. Try it out!

This provides the CAD community with secure access to CAD-hosted file shares **without using VPN**.

This web based solution has nuanced limitations and we anticipate problems when trying to upload either very large files or a very large number of files.

Please [submit a ticket](#) if you have any problems using this service.

## Google Apps (G Suite)

Faculty and staff can opt-in for access to a limited number of Google services including Google Drive, Docs, Slides, and Sheets. Most other Google services are not available to faculty and staff with your RIT account, e.g. YouTube and Gmail; these services require a

personal Google account.

You can opt-in at <https://start.rit.edu/>. Click on the Google Preference button. Once you've opted-in, you'll be able to use Google services by signing in with yourRITusername@g.rit.edu, e.g. [abcfaa@g.rit.edu](mailto:abcfaa@g.rit.edu).

## Video Conferencing: Zoom

Zoom: <https://rit.zoom.us/>

RIT students, faculty, and staff are now licensed for Zoom. Meetings can contain up to 300 participants. (Let us know if this isn't enough.)

When launching the Zoom app on mobile or desktop, click **Sign In** and then **Sign in with SSO**. Enter **rit** for company domain and click continue. Sign in with your RIT username and password.

Zoom has support for captioning and interpreting.

**RIT Specific Documentation for Classroom use of Zoom is available here:**

<https://www.rit.edu/coronavirus/course-resources-for-faculty#synchronous-meetings> (link restricted to faculty and staff only)

ILI has assembled an FAQ for RIT Zoom Use here:

[https://docs.google.com/document/d/1G0w\\_Mg9jw1Xa8RYTAwAOsG4FO\\_CL9N0qp6jhVS-X7UY/](https://docs.google.com/document/d/1G0w_Mg9jw1Xa8RYTAwAOsG4FO_CL9N0qp6jhVS-X7UY/)

Here are some great tutorials to help get you up to speed with Zoom:

<https://support.zoom.us/hc/en-us/articles/206618765-Zoom-Video-Tutorials>

## myCourses

RIT's myCourses will continue to be the primary Learning Management System (LMS) for classes.
