Projection In GAN-1217

Brie McIntosh - 2025-01-15 - AV and Projection

Overview:

This teacher station has an iMac 27" at the Desk connected over DVI to the Canon Projector. Includes a KVM display/audio switcher for easy connection of your laptop. For any problems please submit a ticket to https://helpdesk.cad.rit.edu

Location:

Located to the lower left of the Teacher Station iMac is the StarTech KVM and the room audio control box.

How to connect:

Desktop:

Make sure the desktop iMac is turned on and awake. Turn the projector on in the room and then (if not already selected), press the **Select** button on the KVM till the light below **Desktop** illuminates. You are now connected.

Laptop or iPad:

Use the following cable to connect your laptop. The black adapter will work with newer USB-C type laptops. The white connector will work with any laptop that accepts mini DisplayPort. Plug-in the **Green** audio connector to your headphone port if you need audio.

Make sure your device is turned on and awake. Turn the projector on in the room and then (if not already selected) press the **Select** button on the KVM till the light below **Laptop** illuminates. You are now connected.

Audio:

Turn audio knob clockwise to turn the power on (blue light will illuminate) and then continue turning clockwise to increase output level.
