Where can I print as a student?

Erich S. Lehman - 2026-08-26 - [Computer Labs](#)

CAD OPTIONS:

LOCATION OF LAB-BASED PRINTERS:

CAD offers black and white toner-based printing for students for free as long as it isn't abused (only print what you actually need, don't print out entire textbooks!!) You can find the location of the black and white laser printers at the link below.

<https://helpdesk.cad.rit.edu/kb/articles/computer-lab-status>

COLOR PRINTING AT THE CAD HELPDESK

Most open CAD computer labs also have a print queue named **GAN1263 Hold Queue** that will send prints to the CAD Helpdesk, located in **7B-1263**. This gives you an option if the lab you are working in doesn't have a printer, or if there is a problem with the printer and you are in a bind. This printer is accessible during open Helpdesk hours and can print color on letter (8.5x11") and tabloid (11"x17") size paper.

Due to the cost of supplies, color printing is more managed than the free black and white toner-based printers that are deployed around the labs.

OPEN LAB

Located in **7B-1212**, the computer lab has a color Xerox printer that can print letter-sized (8.5"x11") paper. It is open 24-7 and free for CAD-matriculated students to use.

COLOR INKJET IN THE K-LABS

The K-Labs - **7B-4060** and **7B-4090** - offer sit down ink jet printing for pay. Students must bring their own paper.

ISL - IMAGING SYSTEMS LAB

Available on the third floor of Gannett in room **7B-3090**, ISL offers walkup and drop off digital inkjet, wide format, and laser printing

You can learn all about their options via [this brochure](#).

3D PRINTING AT CAD FABLAB

The Fabrication Lab within the College of Art & Design is located in Booth, **7A-2574**. They provide 3D printing services, as well as laser cutting and CNC routing, provided you supply your own approved stock.

Visit <https://fablab.cad.rit.edu> to submit files and learn more.

NON-CAD OPTIONS:

RIT Print Now - Print From Anywhere program

New for Fall 2026, print from your laptop, tablet, or phone and then securely release your documents at [participating printers](#) using your RIT ID.

For more information, including how to submit from a browser or directly from your device:

<https://www.rit.edu/its/printing>

More details about these services are here: https://help.rit.edu/sp?id=kb_article&sysparm_article=KB0046020

RIT Libraries - Print, Copy, and Scan

<https://www.rit.edu/library/print-copy-and-scan>

The **RIT HUB Express** has been closed as of Fall 2026, and a number of their capabilities can be found in the ISL lab linked above.
