CAD personal/group web hosting is unavailable

2026-07-28 - Joe Schultz - [General](#)

The College of Art and Design personal and group web hosting environment (Wordpress hosting) has ran into a security-related incident causing the platform to need to be quarantined. We are working with the RIT Information Security Office to resolve the issue, and CADTech will be re-engineering some of the backend.

We expect the service to be back next week! (08/03/26)
